Hi Rahul,

I trust this message finds you well. I wanted to express my sincere gratitude for the invaluable mentorship you provided me during my tenure at Dell Technologies. Your guidance has played a pivotal role in my professional development, contributing significantly to my career growth and instilling in me an innovation mindset.

Your expertise was evident throughout the process of developing a patent application, from ideation to prototyping and successful filing. The insightful discussions with attorneys under your guidance went beyond the mechanics of patenting, providing me with a holistic understanding of innovation principles.

I am particularly grateful for the six US Patents ([https://patents.google.com/?q=\(gopal+singh\)&assignee=EMC+IP+Holding+Company+LLC](https://patents.google.com/?q=(gopal+singh)&assignee=EMC+IP+Holding+Company+LLC)) we successfully filed during my time at Dell Technologies. This achievement stands as a testament to the effectiveness of your mentorship in translating ideas into tangible outcomes. Beyond the patents, your influence has cultivated in me a broader innovation mindset that continues to shape my problem-solving approach.

Having known you for over two years since our time at Dell Technologies, I can attest to the enduring impact of your mentorship. Currently employed at Broadcom, I carry forward the insights and skills you imparted, which positively influence my professional journey.

As you pursue your BCS Fellow Application, I want to extend my best wishes. Your dedication, expertise, and impact on my career are truly commendable. Your guidance has been instrumental in shaping my professional journey, and I am confident that you will continue to inspire and guide others to similar heights.

Thank you once again, Rahul, and I wish you all the success in your application for the BCS Fellow.

Sincerely,

Gopal Singh

R&D Engineer SW Quality, BSN
